

Bug Tracking Report

SBPS62 — Food Bank Surplus Redistribution (Problem Statement #62)

This report documents the bug tracking activity carried out for the Food Bank Surplus Redistribution project (Problem Statement #62) using Jira's Bug Tracking workflow. A total of 6 bugs were logged against the project's 5 Functional Requirements (FR-001 to FR-005) and 2 Non-Functional Requirements (NFR-001, NFR-002), ensuring every requirement has at least one associated defect scenario for QA traceability. Each bug entry includes reproduction steps, expected vs. actual behaviour, the related requirement ID, and a priority rating.

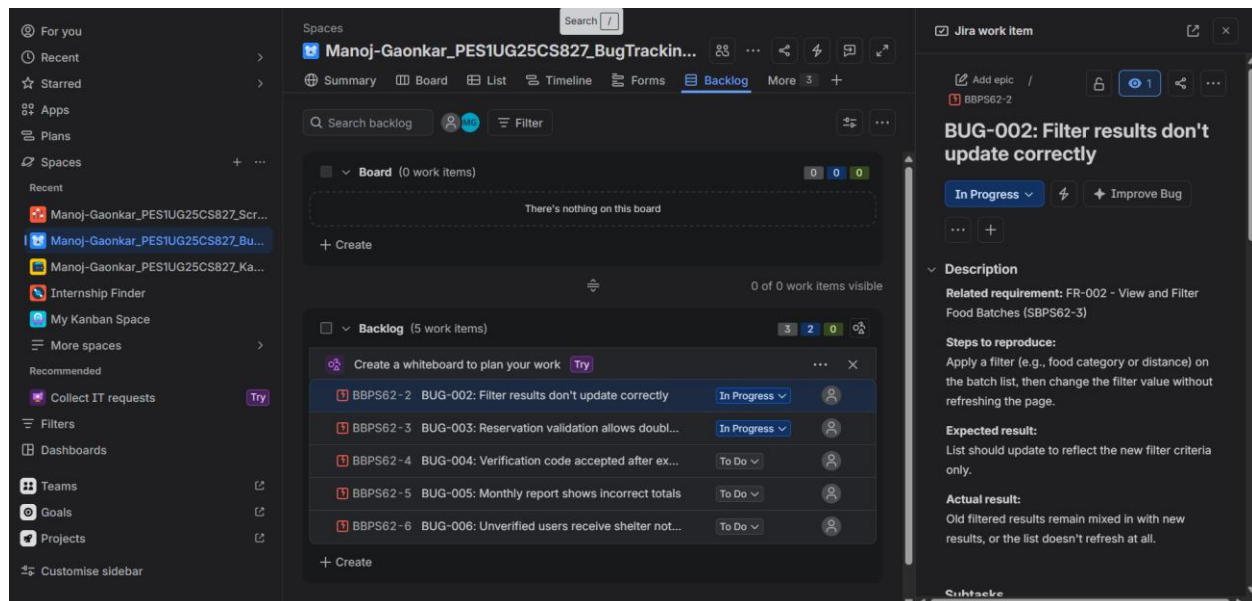

Key	Summary	Related Req.	Priority
BUG-001	Surplus posting accepts invalid/expired data	FR-001	High
BUG-002	Filter results don't update correctly	FR-002	Medium
BUG-003	Reservation validation allows double-booking	FR-003	High
BUG-004	Verification code accepted after expiry	FR-004	High
BUG-005	Monthly report shows incorrect totals	FR-005	Medium
BUG-006	Unverified users receive shelter notifications	NFR-001	Highest

1. Bug Tracking Board Overview — All Reported Bugs

The SBPS62 Bug Tracking board showing all 6 reported bugs, currently sitting in the To Do column awaiting triage. BUG-006 (highest priority — verified-access bypass) should be prioritised first once triage begins.

2. BUG-001 — Surplus posting accepts invalid/expired data

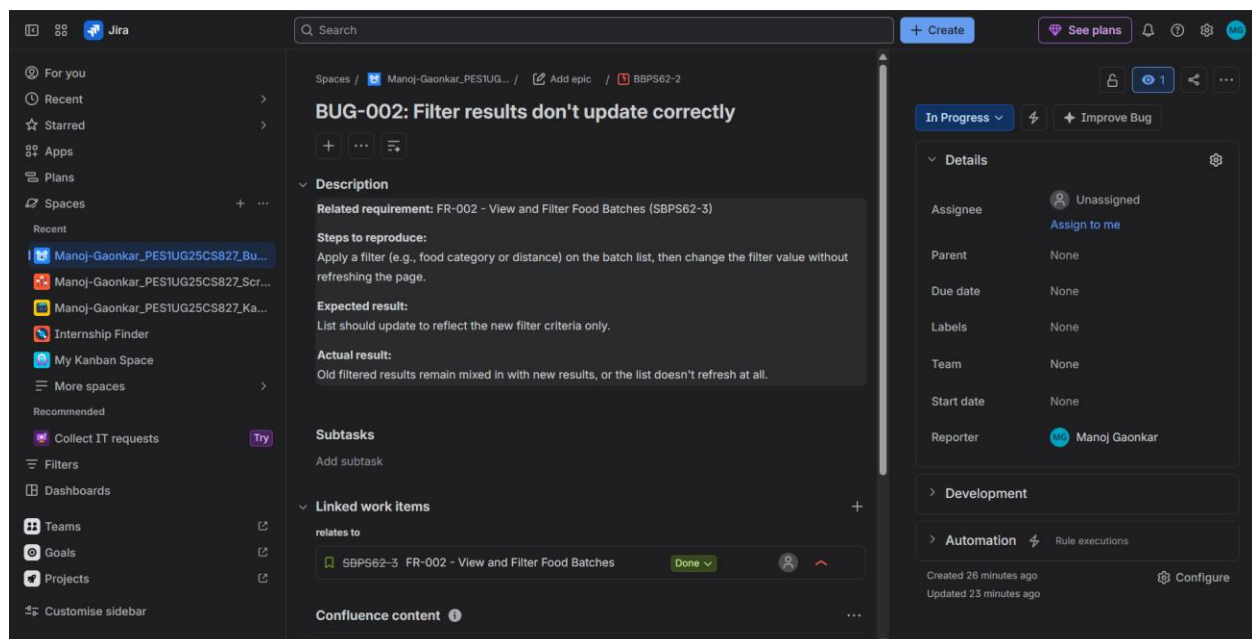

Related Requirement(s): FR-001 - Post Surplus Food Packages | **Priority:** High | **Jira Key:** SBPS62-10

Steps to Reproduce: Donor posts a surplus food package with a pickup window set in the past, or leaves the quantity field blank/zero.

Expected Result: System should reject the post and show a validation error.

Actual Result: The post is accepted and appears in the active listings as if valid.

3. BUG-002 — Filter results don't update correctly

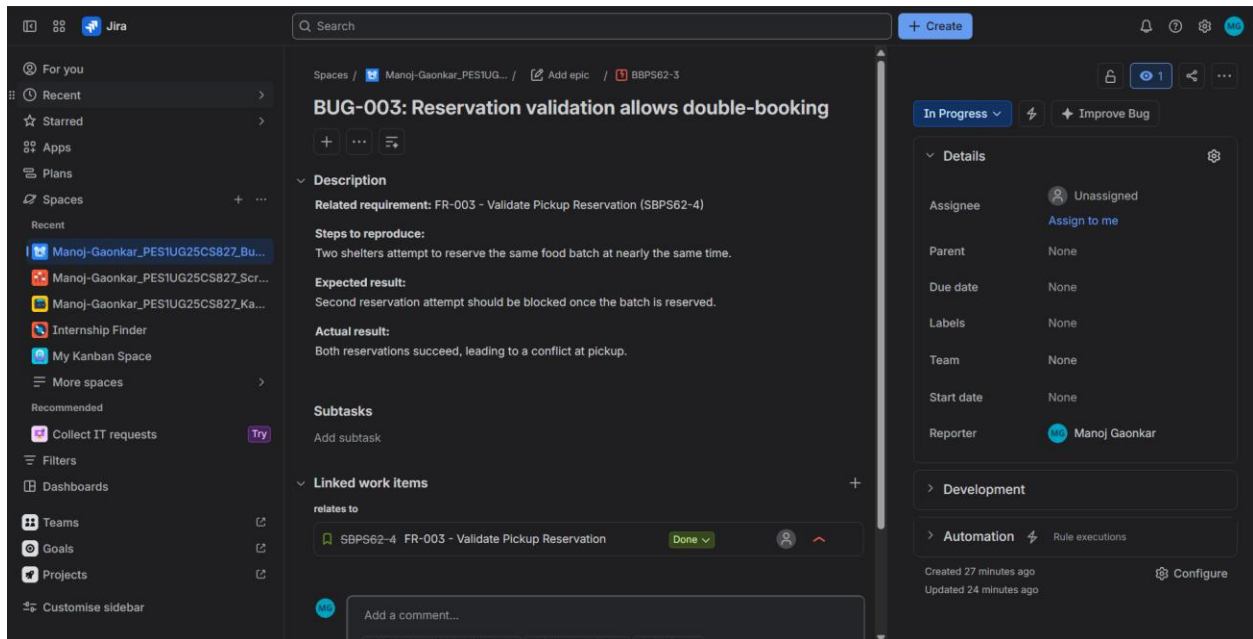

Related Requirement(s): FR-002 - View and Filter Food Batches | **Priority:** Medium | **Jira Key:** SBPS62-11

Steps to Reproduce: Apply a filter (e.g., food category or distance) on the batch list, then change the filter value without refreshing the page.

Expected Result: List should update to reflect the new filter criteria only.

Actual Result: Old filtered results remain mixed in with new results, or the list doesn't refresh at all.

4. BUG-003 — Reservation validation allows double-booking

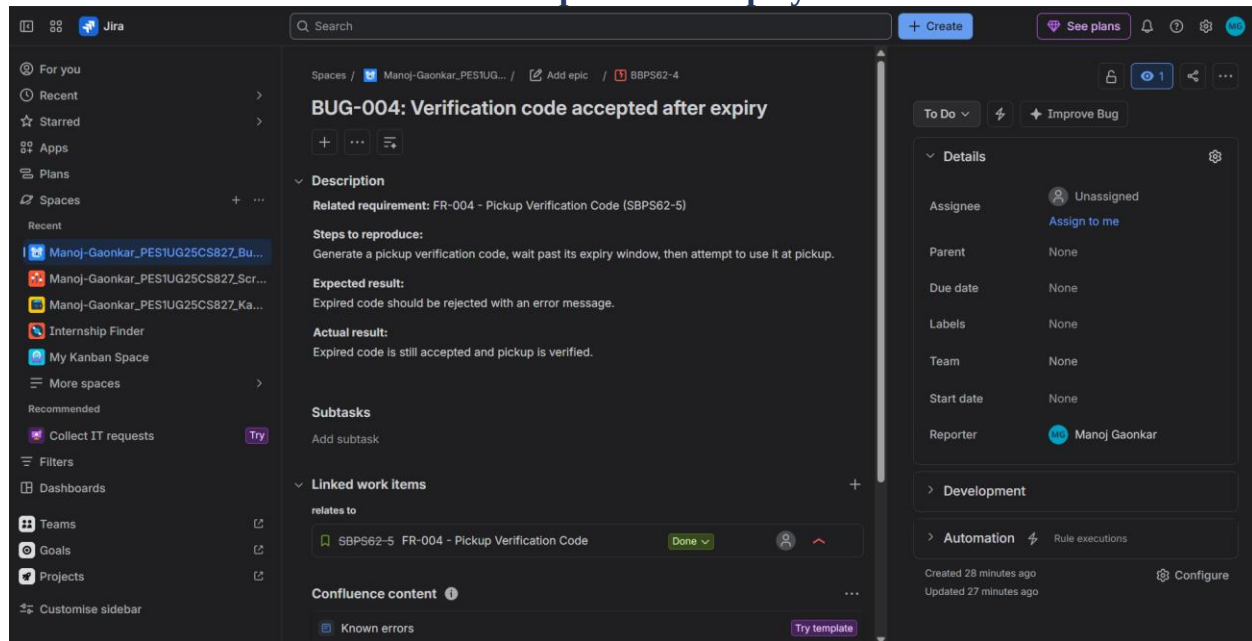

Related Requirement(s): FR-003 - Validate Pickup Reservation | **Priority:** High | **Jira Key:** SBPS62-12

Steps to Reproduce: Two shelters attempt to reserve the same food batch at nearly the same time.

Expected Result: Second reservation attempt should be blocked once the batch is reserved.

Actual Result: Both reservations succeed, leading to a conflict at pickup.

5. BUG-004 — Verification code accepted after expiry

The screenshot shows the Jira interface for issue BUG-004. The left sidebar contains navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', and 'Filters'. The main content area displays the issue details: 'BUG-004: Verification code accepted after expiry'. The description includes a related requirement (FR-004 - Pickup Verification Code), steps to reproduce (Generate a pickup verification code, wait past its expiry window, then attempt to use it at pickup), expected result (Expired code should be rejected with an error message), and actual result (Expired code is still accepted and pickup is verified). The 'Subtasks' section shows 'Add subtask'. The 'Linked work items' section shows a link to 'SBPS62-5 FR-004 - Pickup Verification Code' with a 'Done' status. The 'Confluence content' section shows 'Known errors'. The right sidebar contains a 'Details' panel with fields for Assignee (Unassigned), Parent (None), Due date (None), Labels (None), Team (None), Start date (None), and Reporter (Manoj Gaonkar). Below this is a 'Development' section and an 'Automation' section. The bottom right corner shows 'Created 28 minutes ago' and 'Updated 27 minutes ago'.

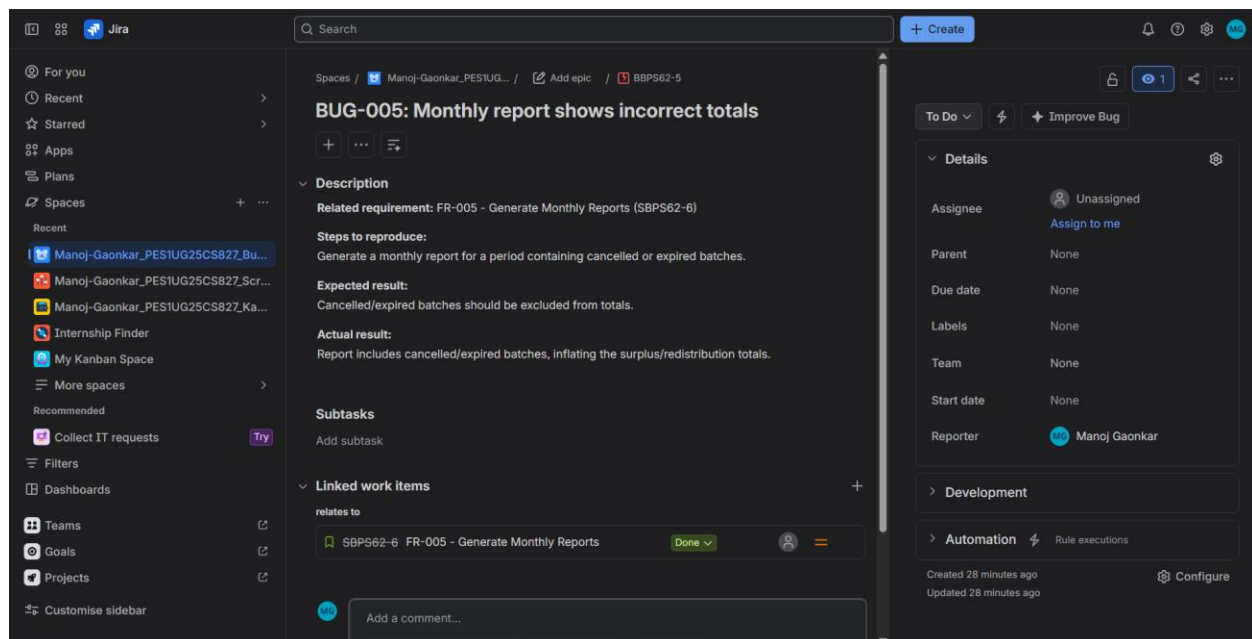

Related Requirement(s): FR-004 - Pickup Verification Code | **Priority:** High | **Jira Key:** SBPS62-13

Steps to Reproduce: Generate a pickup verification code, wait past its expiry window, then attempt to use it at pickup.

Expected Result: Expired code should be rejected with an error message.

Actual Result: Expired code is still accepted and pickup is verified.

6. BUG-005 — Monthly report shows incorrect totals

The screenshot shows the Jira interface for issue BUG-005. The left sidebar contains navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', and 'Filters'. The main content area displays the issue details: 'BUG-005: Monthly report shows incorrect totals'. The description includes a related requirement (FR-005 - Generate Monthly Reports), steps to reproduce (Generate a monthly report for a period containing cancelled or expired batches), expected result (Cancelled/expired batches should be excluded from totals), and actual result (Report includes cancelled/expired batches, inflating the surplus/redistribution totals). The 'Subtasks' section shows 'Add subtask'. The 'Linked work items' section shows a link to 'SBPS62-6 FR-005 - Generate Monthly Reports' with a 'Done' status. The 'Confluence content' section shows 'Add a comment...'. The right sidebar contains a 'Details' panel with fields for Assignee (Unassigned), Parent (None), Due date (None), Labels (None), Team (None), Start date (None), and Reporter (Manoj Gaonkar). Below this is a 'Development' section and an 'Automation' section. The bottom right corner shows 'Created 28 minutes ago' and 'Updated 28 minutes ago'.

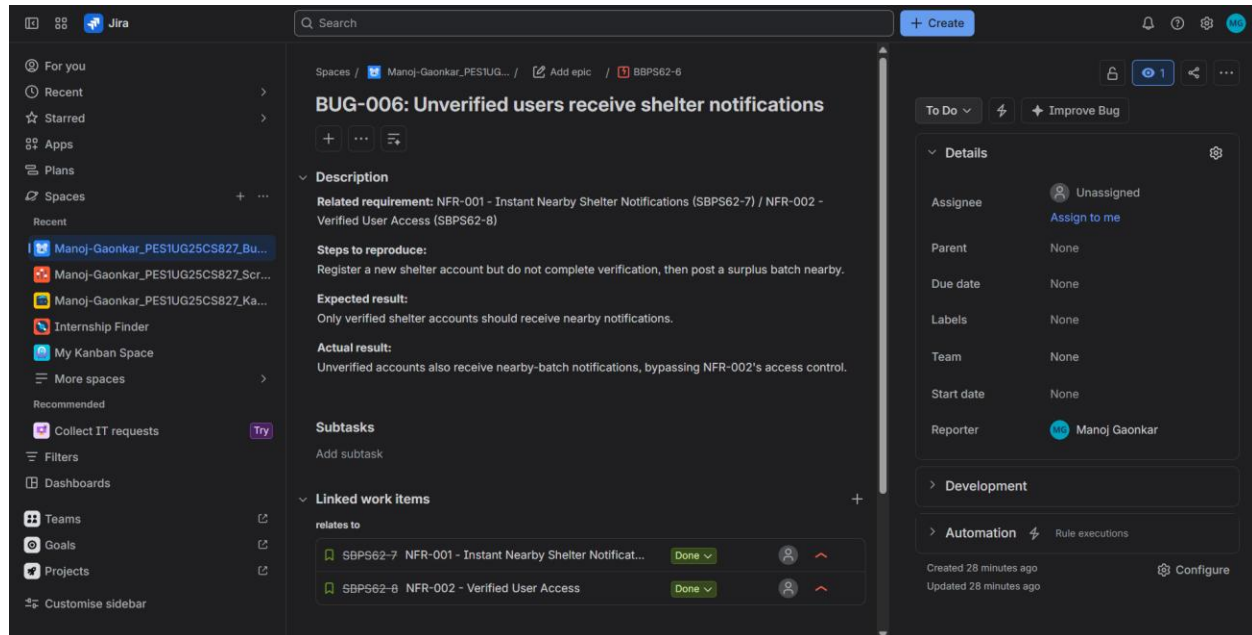

Related Requirement(s): FR-005 - Generate Monthly Reports | **Priority:** Medium | **Jira Key:** SBPS62-14

Steps to Reproduce: Generate a monthly report for a period containing cancelled or expired batches.

Expected Result: Cancelled/expired batches should be excluded from totals.

Actual Result: Report includes cancelled/expired batches, inflating the surplus/redistribution totals.

7. BUG-006 — Unverified users receive shelter notifications

The screenshot shows a Jira interface with a bug report titled "BUG-006: Unverified users receive shelter notifications". The bug is located in the space "Manoj-Gaonkar_PESTUG25CS827_Bu...". The bug's description includes the following details:

- Related requirement:** NFR-001 - Instant Nearby Shelter Notifications (SBPS62-7) / NFR-002 - Verified User Access (SBPS62-8)
- Steps to reproduce:** Register a new shelter account but do not complete verification, then post a surplus batch nearby.
- Expected result:** Only verified shelter accounts should receive nearby notifications.
- Actual result:** Unverified accounts also receive nearby-batch notifications, bypassing NFR-002's access control.

The bug is currently assigned to "Unassigned" and has a reporter "Manoj Gaonkar". The bug was created 28 minutes ago and updated 28 minutes ago. The bug is linked to two requirements: "SBPS62-7 NFR-001 - Instant Nearby Shelter Notificat..." and "SBPS62-8 NFR-002 - Verified User Access".

Related Requirement(s): NFR-001 - Instant Nearby Shelter Notifications / NFR-002 - Verified User Access | **Priority:** Highest | **Jira Key:** SBPS62-15

Steps to Reproduce: Register a new shelter account but do not complete verification, then post a surplus batch nearby.

Expected Result: Only verified shelter accounts should receive nearby notifications.

Actual Result: Unverified accounts also receive nearby-batch notifications, bypassing NFR-002's access control.
